Professional Summary

Software Engineering graduate with a strong foundation in OOP, C#, Java, and Python. Skilled in backend development, database design, and REST API integration with hands-on experience through academic, industry, and personal projects. Familiar with .NET development fundamentals and Windows application workflows, with proven adaptability to new technologies. Experienced in Agile environments and eager to contribute to building scalable, user-focused solutions at Disrupt.

Education

FAST NUCES — Karachi, Pakistan
Bachelor of Science in Software Engineering — *Aug 2021 – Jun 2025*
- Relevant Coursework: Recommender Systems, Applied DevOps, Web Engineering, Information Security

Experience

Software Engineering Teaching Assistant — Jan 2025 – Jun 2025
FAST NUCES — *Karachi, Pakistan*
- **Reviewed** .NET, MERN, PHP projects of **40+** students, ensuring functionality and scalability
- **Mentored** students in debugging application logic and optimizing database queries for performance

Software Engineering Intern — Aug 2024 – Oct 2024
SuperNova Solutions Pvt. Ltd. — *Karachi, Pakistan*
- **Assisted** in backend support tasks and data handling for internal tools during feature development
- **Performed** manual UI and functional testing, identifying **10+** critical issues to improve system stability

Game Development Intern — Jun 2023 – Aug 2023
Mindstorm Studios — *(Remote) Lahore, Pakistan*
- **Implemented C#** modules in Unity using OOP principles, enhancing gameplay mechanics and stability
- **Debugged** and **optimized** performance issues, applying version control and Agile workflows for timely feature delivery.

Technical Skills

- **Languages:** C#, Java, Python, JavaScript, SQL
- **Frameworks:** .NET (Learning), React.js, Next.js, JUnit, PyTorch
- **Databases:** MySQL, MongoDB (Learning), Oracle DB
- **Tools & Platforms:** Git, Docker, GitHub Actions, AWS CDK, Maven, Linux (basic)

Projects

E-Commerce Innovations | Capstone Project — 2024 – 2025
- **Developed** AR-powered full-stack e-commerce platform with **Next.js** and **MongoDB**
- **Integrated** Stripe for payments and Google Analytics for real-time user insights

Multimodal Reddit Credibility Assessment | Personal Project — 2025 – Ongoing
- **Designed** data ingestion pipeline combining text & image data; implemented preprocessing workflows
- **Built** backend logic for feature extraction, topic modeling, and deployed interactive analytics prototype

Job Recommender NLP | Personal Project | GitHub — 2025
- **Implemented** job recommendation engine using Sentence-BERT and spaCy for resume-job similarity
- **Integrating** live job data via platform APIs and developed preprocessing pipelines

JCLI - Java Command Line Interface | Personal Project | GitHub — 2025
- **Developed** POSIX-compliant CLI in Java with modular design and error handling
- **Achieved** 90% test coverage using JUnit integration tests

Cloud-Native Web Deployment Pipeline | Personal Project | GitHub — 2025
- **Built** a TypeScript CDK app to deploy containerized backend services on **ECS Fargate** with ALB and **CloudFront**
- **Automated** CI/CD pipelines using GitHub Actions, Docker, and AWS ECR for zero-downtime deployments

Certifications

- **Docker for Beginners** — ***KodeKloud***
- **Introducing DevOps for Developers** — ***Frontend Masters***
- **OCI AI Foundations** — ***Oracle***
- **Introduction to Software Testing** — ***University of Minnesota***
- **Black-box and White-box Testing** — ***University of Minnesota***

Leadership & Volunteering

Aspire Leaders Program ***(Aspire Institute x Harvard)*** — 2025
Co-Head, Code in the Dark Competition ***(Dev Day, FAST NUCES)*** — 2024
Treasurer, ACM Software Engineering Chapter ***(FAST NUCES)*** — 2023 – 2024
